# ESCATEQ ESCALATOR CLEANING TOOLS

## Tread-TEQ Tool System and Cleaning Pads

- ▶ The Tool system includes: head unit, saturation trough, telescoping handle and a laminated instructional poster.
- ▶ Available in 600mm, 800mm and 1000mm widths.
- ▶ Available in four patterns
- ▶ Washable and reusable.

**Identify what tread pattern your Escalator uses so you can select the appropriate type of cleaning pads ('V' or 'W')**

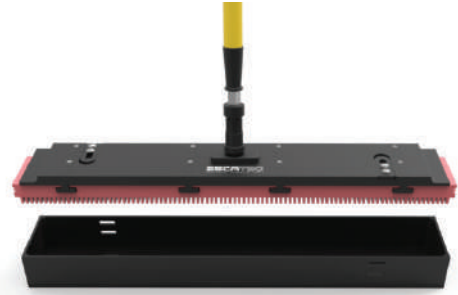

### ▶ 60 CM System

Use on 60-CM or wider escalators and travellators

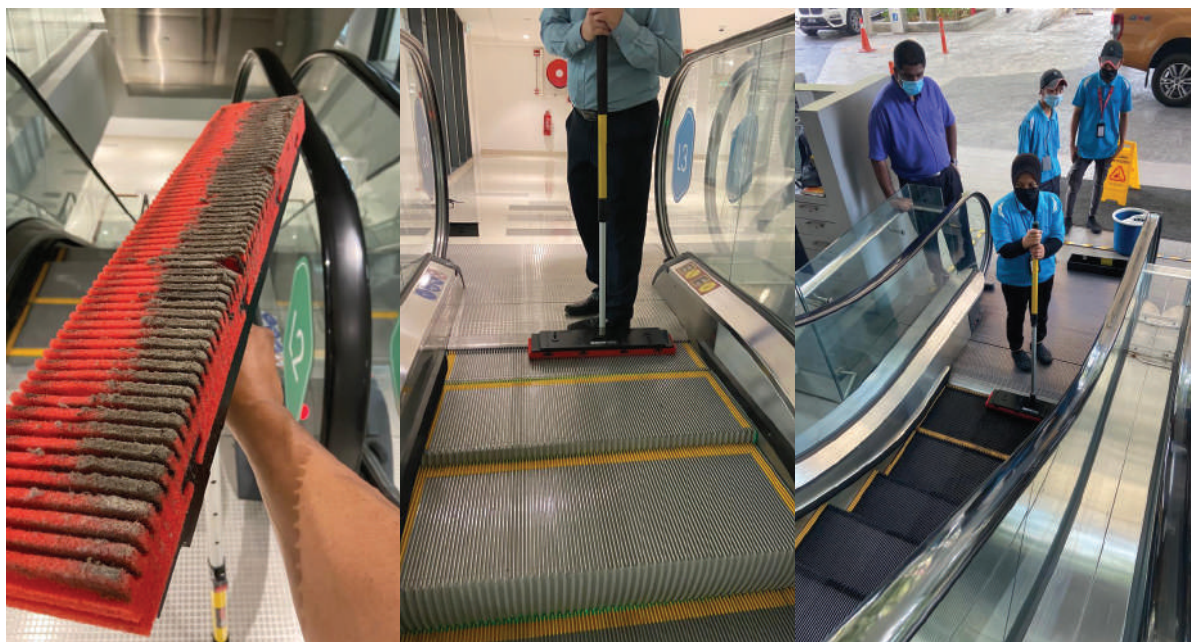

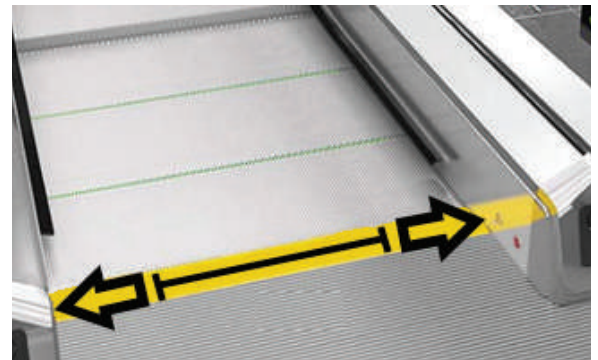

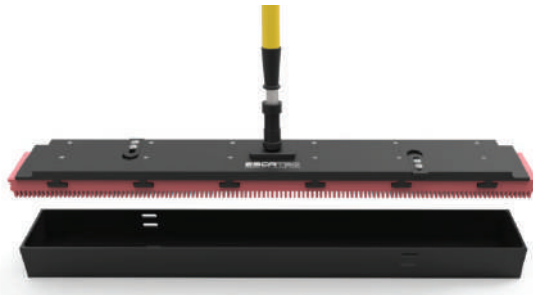

### ▶ 80 CM System

Use on 80 CM or wider escalators and travellators

### ▶ 100 CM System

Use on 100 CM or wider escalators and travellators

## Absorb-TEQ

**Absorb-TEQ** is a patented cleaning sponge formulation that allows our Tread-TEQ and Riser-TEQ cleaning pads to clean faster and more completely. Absorb-TEQ rinses better and dries faster too.

### **Clean the vertical risers of your escalator quickly and easily with Riser-TEQ**

Riser-TEQ is a lightweight, one person operational, easy to use tool and pad system that allows for rapid and effective riser cleaning. The head unit is very light, so it moves quickly, with little effort for faster, more effective cleaning. The removable, washable, reusable cleaning pads mount and remove easily

### **Why does Absorb-TEQ work better than a regular sponge material?**

#### ▶ **A better cleaning pad:**

The unique and patented formulation allows for a higher ILD (Indentation Load Deflection) which provides for a more rigid material, allowing the teeth of our cleaning pads to apply greater pressure at the very bottom of the treads' grooves, where the majority of dirt accumulates. By generating more pressure at the bottom of the tread or riser grooves, more dirt is removed faster, with less effort.

#### ▶ **A larger cleaning surface:**

Because Absorb-TEQ is so rigid, a backer material (found on other brands) is not required. Because sponge is normally soft, it cannot withstand the pressures generated by an escalators' movement. Backer materials are added to resolve this material weakness, to increase the strength of the pads. However, since backer materials are made from PE (Polyethylene) performance is diminished because PE is a closed cell foam, not designed or intended to clean. With Absorb-TEQ, the entire pad cleans, and cleans with up to 25% more cleaning surface, delivering up to 25% faster and better cleaning.

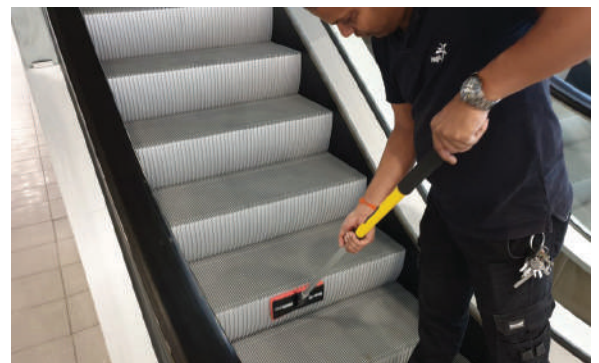

#### ▶ **Absorb-TEQ is a dirt magnet:**

The unique patent pending formulation of Absorb-TEQ also delivers a better cleaning result because of its more aggressive cell structure. Feel the texture of an Absorb-TEQ pad and feel the cleaning power generated by its design, allowing our pads and our systems to remove more dirt faster, with less effort.

## Riser-TEQ

### **Clean the vertical risers of your escalator quickly and easily**

Riser-TEQ is a lightweight, one person operational, easy to use tool and pad system that allows for rapid and effective riser cleaning. The head unit is very light, so it moves quickly, with little effort for faster, more effective cleaning. The removable, washable, reusable cleaning pads mount and remove easily

# ESCATEQ ESCALATOR CLEANING TOOLS

## Clean-TEQ

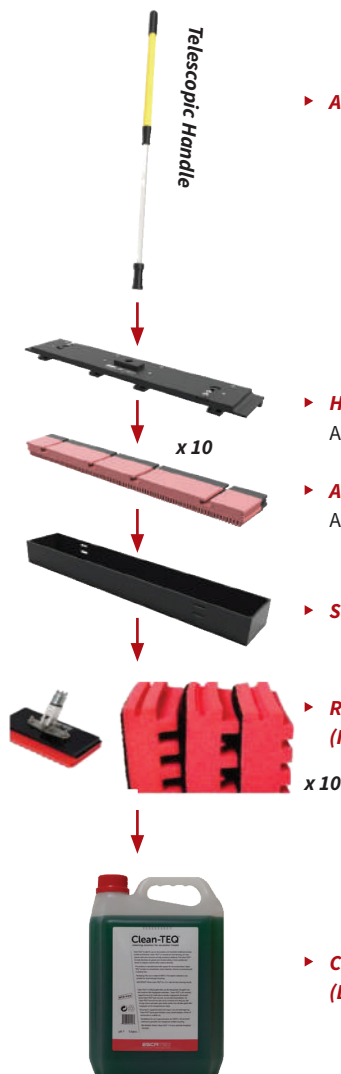

### Why use Clean -TEQ instead of any other cleaning solution?

Escalators are the most expensive, most visible and often, the most dangerous flooring in any building. Therefore, escalators have critical requirements that if not properly met, can create exposure to hazards or cause damage to their finishes, components or safety systems.

Clean-TEQ is formulated to be safe for use on all escalator and traveller (walkway) brands models and finishes. Clean-TEQ is a “quat based” neutral pH, low foaming, no rinse cleaner with anti-corrosion and slip resistance additives. Clean-TEQ dissolves oil, grease and mineral soiling. Clean-TEQ dries quickly leaving no slippery residue when used as directed.

### Important:

- ▶ **Clean-TEQ is the only solution formulated specifically for use with Absorb-TEQ pads. Using other cleaning solutions may compromise the pads life expectancy, cleaning effectiveness and, the ability to rinse out adequately for reuse.**
- ▶ **Other cleaning solutions may leave a residue, potentially damaging the escalators treads finish or, cause the treads to become slippery, especially when drinks are spilled on them.**
- ▶ **Other cleaning solutions may not have corrosive inhibitors, potentially causing damage to the mechanics or electronics, including safety systems that operate beneath.**

▶ **Adjustable Telescopic Handle**

▶ **Head Unit**  
Available in different sizes of 60, 80, and 100 cm

▶ **Absorb-TEQ : 10 Pack Pad (V or W Tread Pattern)**  
Available in different sizes of 60, 80, and 100 cm

▶ **Saturation Tub**

▶ **Riser-TEQ : 10 Pack Pad (I, T or U Pattern)**  
x 10

▶ **Cleaning Solution**  
(Dilute Clean-TEQ 1:10 with water before use )
